Program Description

The Rhode Island Thoracic Society Annual Meeting 2019 will address evolving issues lung injury and specifically focused on the impact of smoking, air-pollution, and e-cigarettes. Especially in light of many current events linking vape devices and lung disease this will be a salient discussion. In addition the event will highlight ways in which the Rhode Island community can be involved in helping to curb use of tobacco products and advocate for our patients.

Target Audience

Pulmonary/Critical Care and Primary Care Physicians, Physician Assistants, Nurses, Respiratory Therapists, Residents, Fellows, and Medical Students.

Learning Objectives

At the conclusion of this activity, participants should be able to:

1. Identify acute pulmonary toxicities of tobacco products
2. Describe epidemiologic associations between tobacco products, air pollution, and ARDS
3. Define mechanistic links between tobacco products and acute lung injury
4. Explain basics of e-cigarette design, components, and current knowledge regarding pulmonary health effects
